

API Performance Testing of EV Admin

Scenario 1: Test the login API for 50 users simultaneously.

Pre-requisite –

Response Time >= 1s

Test Script Name: EVAdminLogin.jmx

Test Case ID	Test Case Name	Test URL	HTML Test Report Name	Test Result (csv file name)	Status
Login_001	Verify that 50 Super Admin users can successfully log in to the Super Admin website simultaneously.	http://192.168.1.32:7777/superadmin/	SAadminloginReport	SAadminlogin.csv	Passed
Login_002	Verify that 50 Reseller Admin users can successfully log in to the Reseller Admin website simultaneously.	http://192.168.1.32:7777/reselleradmin/	RAadminloginReport	RAadminlogin.csv	Passed
Login_003	Verify that 50 Client Admin users can successfully log in to the Client Admin website simultaneously.	http://192.168.1.32:7777/clientadmin/	CAadminloginReport	CAadminlogin.csv	Passed
Login_004	Verify that 50 Association Admin users can	http://192.168.1.32:7777/associationadmin/	AAadminloginReport	AAadminlogin.csv	Passed

	successfully log in to the Association Admin website simultaneously.				
--	--	--	--	--	--

Scenario 2: Verify that each Admin API responds within 1 second under expected load conditions.

Pre-requisite –

Response Time > = 1s

Response Time(ms)	Status
0 - 200	Excellent
200 -500	Good
500 – 1000(1s)	Acceptable
>1sec	Needs Optimization

Test Script Name: EVAdmin_APIPerformanceTesting.jmx

Test Case ID	Test Case Name	HTML Test Report Name	Test Result (csv file)	Status
API_RT_001	Verify that the response time of each Super Admin API is below 1 second.	SA_API_TestReport	SA_API.csv	
API_RT_002	Verify that the response time of each Reseller Admin API is below 1 second.	RA_API_TestReport	RA_API.csv	
API_RT_003	Verify that the response time of each Client Admin API is below 1 second.	CA_API_TestReport	CA_API.csv	
API_RT_004	Verify that the response time of each Association Admin API is below 1 second.	AA_API_TestReport	AA_API.csv
