

SAI SANTHAN YEDDULA

9959860605 | saisanthanyeddula@gmail.com | Andhrapradesh

Objective

Aspiring to secure a Software Engineer position in a reputed organization, where I can leverage my expertise in C, Python, C++, Linux, and Data Structures and Algorithms (DSA) to deliver impactful solutions. I am committed to contributing to organizational growth by applying my technical skills, fostering innovation, and continuously

Education

Bachelor's Degree in Electrical and Electronics Engineering (EEE)

P.B.R. Visvodaya Institute of Technology and Science | J.N.T.U.A

June | 2024 | 72%

Diploma in Electrical and Electronics Engineering (EEE)

Sri Sai Institute of Technology & Science | S.B.T.E.T

November | 2020 | 73%

Secondary School Certificate (SSC)

Bhashyam High School | State Board

March | 2016 | 80%

Projects

Project 1:

Title: Electrical Fault Detection and Analysis Using Arduino - Based On Household Appliances

- **Languages Used:** Embedded C.
- **Project Overview:** Developed a real-time electrical fault detection system for monitoring parameters like temperature, humidity, flame detection, voltage, and current using sensors. Integrated the system with an IoT platform (Ubidots) to send live data. The system detects electrical faults such as low voltage, high voltage, and open circuits and takes necessary actions like turning off loads and activating safety measures
- **Technologies/Tools Used:**
 - **Hardware parts:** Arduino, DHT11 sensor, LCD, Flame sensor, Voltage sensor, Current sensors, Buzzer, and Fan. Ubidots IoT platform for remote monitoring of system data. Smart Street Light Using Python Control System

Project 2:

Title: Rooms and Restaurant Management.

- **Language Used:** C programming.
- **Project Overview:** Developed a comprehensive system to manage hotel room bookings and restaurant table reservations. The application includes modules for user authentication, room management, restaurant menu ordering, and feedback collection. It provides functionalities like booking, modifying, and cancelling reservations, managing menus, viewing bookings, and generating bills. The program leverages file handling to store persistent data for rooms, orders, and user accounts.
- **Technologies/Tools Used:**
 - C Standard Libraries: stdio.h, stdlib.h, string.h, time.h, type.h, conio.h.
 - File handling for data persistence

Project 3:

Title: Voice Assistant

- **Language Used:** Python.
- **Project Overview:** Designed and implemented a voice-activated assistant named Friday to provide hands- free interaction for performing various tasks, including playing music, retrieving the time/date, sending emails, searching Wikipedia, opening websites, and interacting with OpenAI's ChatGPT. The assistant listens to voice commands, processes them using speech recognition, and responds dynamically using text- to- speech.
- **Technologies/Tools Used:**
 - Python Libraries: speech_recognition, pyttsx3, pywhatkit, wikipedia, smtplib, openai.
 - Key Functionalities: Task Execution, OpenAI Integration, Secure Email Handling.

Project 4:

Title: Library Management System

- **Language Used:** C
 - **Project Overview:** Developed a Library Management System to handle book records, borrowing, returning, and purchasing books. The system maintains a catalog and allows users to search for books, update details, and track availability status.
 - **Technologies/Tools Used:**
 - C Standard Libraries: stdio.h, stdlib.h, string.h.
 - File Handling: Uses a binary file for persistent storage.
-

Professional course/workshop attended

- Completed a Postgraduate Diploma in Embedded Systems Design and Development at the Indian Institute of Embedded Systems - IIES, Bangalore.
 - Interned in Python programming at the Indian Institute of Embedded Systems - IIES, Bangalore.
 - Mastered application development in Python Programming at P.B.R. Visvodaya Institute of Technology and Science, Kavali, through training with Deeksha Technologies.
-

Achievements

- Earned an NPTEL certificate in Smart Grids: Basics to Advanced Technologies.
 - Achieved an NPTEL certificate in Cyber Security and Privacy.
 - Secured 2nd prize in a project expo conducted by Bhashyam School in 2014.
 - Actively participated in a PPT presentation hosted by Geethanjali, Nellore, in 2023.
 - Won 2nd prize in a quiz competition conducted by D.B.S. College, Kavali, in 2023.
-

Skills

- C, C++, Python, Linux, Git(version control), HTML, CSS, Embedded C.
-

Language

- English, Telegu, Hindi, Tamil
