📍 Bangalore

Profile

Proficient in Python programming, SQL, and backend API development, with a solid grasp of data structures, algorithms, and object-oriented design principles. Experienced in building and optimizing RESTful APIs with PostgreSQL and MongoDB, and familiar with Docker, Git, and Linux for efficient development workflows. Passionate about creating scalable, automation-driven backend systems and leveraging data to build reliable, high-performance applications.

Education

2021 – 2024 Kavali	Bachelor's Degree in Electrical and Electronics Engineering (EEE) <i>P.B.R. Visvodaya Institute of Technology and Science</i>
2016 – 2020 Rayachoty	Diploma in Electrical and Electronics Engineering (EEE) <i>Sri Sai Institute of Technology & Science</i>
2016 Rajampeta	Secondary School Certificate (SSC) <i>Bhashyam High School</i>

Professional Experience

06/2025 Bengaluru	Associate software engineer <i>Outdid Unified PVT LTD</i> • Developing and maintaining full-stack web applications using Python (FastAPI) and Node.js (Express.js) with React.js for dynamic frontends. • Implementing Kafka-based event-driven systems, RESTful APIs, and database integrations using MongoDB and PostgreSQL. Collaborating on scalable backend architecture, authentication, and performance optimization for seamless deployment.
01/2024 – 01/2025 Tirupati	Trainee <i>NEOLYN ELECTRONICS PRIVATE LIMITED</i> Worked in the Debug Department focusing on product data entry, verification, and validation processes. Assisted in identifying false testing issues in both hardware and software components, ensuring data accuracy and quality control. Gained hands-on experience with technical debugging procedures and internal testing workflows used in manufacturing environments.

Projects

10/2025	Water Purifier Management System <i>Smart IoT-Integrated Water Purifier Platform</i> Developing an admin-side web application to manage water purifier products, customer orders, installations, and firmware updates. Implemented backend APIs using Express with MQTT-based real-time monitoring for connected devices. Designed a responsive admin dashboard using React + Vite for efficient management and analytics.
---------	---

07/2025 – 09/2025	Semiconspace.com <i>Semiconductor Product Management Platform</i> Developed a backend system for semiconductor product data ingestion and management. Built modular microservices for categories, manufacturers, pricing, and specifications using FastAPI with ODMantic and Kafka for asynchronous event handling. Containerized the services with Docker for seamless deployment.
01/2024 – 05/2024	Electrical Fault Detection and Analysis Using Arduino - Based On Household Appliances Developed a real-time system using temperature, flame, voltage, and current sensors. • Integrated with IoT platform (Ubidots) for real-time monitoring and alerting. • Tools: Arduino, DHT11, LCD, Voltage/Current Sensors, Embedded C. • link: https://jespublication.com/uploads/2024-V15I40210.pdf
10/2024 – 11/2025	Smart Street Light Control System Languages: Embedded C, Python • Designed a smart streetlight system using Arduino for hardware control and a Python GUI for mode selection (Manual, Auto, Smart). Enabled efficient energy use through real-time serial communication. • Tools: Arduino, Embedded C, Python (serial, tkinter, datetime)

Skills

Programming Languages: Python, JavaScript, SQL, Embedded C

Backend Frameworks & Tools: FastAPI, Express.js, Node.js, RESTful API Design, Kafka

Databases: MongoDB, PostgreSQL

Frontend Technologies: React.js, Vite.js, HTML5, CSS3

DevOps & Deployment: Docker, Git, GitHub, Linux

IoT & Embedded Systems: Arduino, MQTT, Ubidots, Sensor Integration

Data Handling & Automation: Pandas, JSON, API Integration, Data Validation

Concepts & Practices: Object-Oriented Programming (OOP), Data Structures & Algorithms, Version Control, Debugging & Testing

Courses

2024 – 2025 Bengaluru	PGDCA IN Embedded Engineering <i>Indian Institute of Embedded Systems</i>
2023 NPTEL Online Certification	Smart grid: Basics to Advance Technologies <i>India Institute of Technology Roorkee</i>

Certificates

- Internship in Python Programming – IIES, Bangalore
- Training in Application Development using Python – Deeksha Technologies, Kavali

Languages

- English
- Telugu
- Hindi
- Tamil
