Profile

Aspiring Graduate Trainee Engineer with strong knowledge in Python programming, data structures, algorithms, and OOP concepts. Eager to contribute to backend development, RESTful API design, database management (MongoDB, PostgreSQL), and event-driven systems using Kafka. Passionate about continuous learning and innovation in software development and cloud technologies.

Education

2021 – 2024 Kavali	Bachelor's Degree in Electrical and Electronics Engineering (EEE) <i>P.B.R. Visvodaya Institute of Technology and Science</i>
2016 – 2020 Rayachoty	Diploma in Electrical and Electronics Engineering (EEE) <i>Sri Sai Institute of Technology & Science</i>
2016 Rajampeta	Secondary School Certificate (SSC) <i>Bhashyam High School</i>

Projects

04/2023 – 05/2023	Voice assistant Designed and implemented a voice-activated assistant named Friday to provide hands-free interaction for performing various tasks, including playing music, retrieving the time/date, sending emails, searching Wikipedia, opening websites, and interacting with OpenAI's ChatGPT. The assistant listens to voice commands, processes them using speech recognition, and responds dynamically using text-to-speech.
01/2024 – 05/2024	Electrical Fault Detection and Analysis Using Arduino - Based On Household Appliances Developed a real-time system using temperature, flame, voltage, and current sensors. • Integrated with IoT platform (Ubidots) for real-time monitoring and alerting. • Tools: Arduino, DHT11, LCD, Voltage/Current Sensors, Embedded C. • link:https://jespublication.com/uploads/2024-V15140210.pdf 📄
10/2024 – 11/2025	Smart Street Light Control System Languages: Embedded C, Python • Designed a smart streetlight system using Arduino for hardware control and a Python GUI for mode selection (Manual, Auto, Smart). Enabled efficient energy use through real-time serial communication. • Tools: Arduino, Embedded C, Python (serial, tkinter, datetime)
08/2024 – 09/2024	Hostel Management System Developed a Hostel Management System in C++ to handle student records, room allocation, and fee management. Utilized file handling for efficient data storage and retrieval using standard libraries.

Skills

- | | | | |
|----------------------|---------------------|--------------|-----------------|
| • Python Programming | • Git | • Linux | • SQL |
| • HTML | • CSS | • JavaScript | • C Programming |
| • C++ Programming | • Network Protocols | • Django | • Flask |
| • Docker | • Fast Api | • Mongo DB | • PostMan |

Courses

- | | |
|------------------------------------|---|
| 2024 – 2025
Bengaluru | PGDCA IN Embedded Engineering
<i>Indian Institute of Embedded Systems</i> |
| 2023
NPTEL Online Certification | Smart grid: Basics to Advance Technologies
<i>India Institute of Technology Roorkee</i> |

Certificates

- Internship in Python Programming – IIES, Bangalore
- Training in Application Development using Python – Deeksha Technologies, Kavali
- Completed a 4-week course on AWS Certified Cloud Practitioner Exam

Languages

- | | | | |
|-----------|----------|---------|---------|
| • English | • Telugu | • Hindi | • Tamil |
|-----------|----------|---------|---------|

Declaration

I hereby declare that, to the best of my knowledge, the details and information given above are complete and true.
